04 | Colour Palette

Primary Colours

Swatch	Colour & Role	HEX	RGB	CMYK
	Coral — Primary (Affordability & Approachability)	#FF6F59	255, 111, 89	0, 56, 65, 0
	Deep Teal — Secondary (Modern, Trendy & Trustworthy)	#1B4D4A	27, 77, 74	65, 0, 4, 70

Supporting Colours

Swatch	Colour & Role	HEX	RGB	CMYK
	Warm Ivory — Neutral (Clean Base)	#FFF8F0	255, 248, 240	0, 3, 6, 0
	Charcoal Ink — Anchor (Trust & Readability)	#2B2B2B	43, 43, 43	0, 0, 0, 83
	Golden Mustard — Accent (Value Callouts)	#F2B134	242, 177, 52	0, 27, 79, 5

How to Use Each Colour

- Coral (Primary): Main brand colour across social media highlights, buttons, product tags and the logo's dominant accent. Use generously on Instagram/TikTok tiles, but avoid full-page backgrounds — keep it as the 'pop' colour.
- Deep Teal (Secondary): The dominant structural colour — website header/footer, navigation bars, packaging base, and the main background behind product photography. This should feel the most 'official' colour of the brand.
- Warm Ivory (Neutral): Page backgrounds, product page whitespace, packaging interiors, and anywhere Coral or Teal need room to breathe. Should make up roughly half of any layout.
- Charcoal Ink (Anchor): Body text, captions, logo wordmark outlines and fine print. A text/detail colour only — not a large colour block.
- Golden Mustard (Accent): Sale badges, limited-time offer tags, discount callouts and urgency CTA buttons. Use sparingly — a small fraction of any design.
-

Recommended Colour Balance

Warm Ivory 50% • Deep Teal 30% • Coral 15% • Golden Mustard 5%

Coral and Golden Mustard should be used as pop/accent colours only. They should never dominate the overall design.

How to Use Each Font

Yaldevi - Headlines, logo type, social titles

Headlines, the logo wordmark, social media titles, and hero graphics on Instagram/TikTok. Use its lighter weights for elegant headline moments.

Gemunu Libre - Sale tags, CTAs, promo punchlines

Discount badges, CTA buttons, and short promo lines where you want attention. Use sparingly, the same way the Golden Mustard color accent is used.

Noto Sans Sinhala - Body text, website/app UI, captions

Product descriptions, website copy, WhatsApp catalogue text, and captions. Anywhere people need to actually read comfortably.

Pairing With the Color Palette

- Yaldevi + Coral/Teal - headlines and hero graphics carry the modern color and modern type together.
- Gemunu Libre + Golden Mustard - the two “value/sale” tools, used together and sparingly.
- Noto Sans Sinhala + Charcoal Ink - the everyday reading pair, used everywhere else.
